

1 Safety Instructions

1.1 General

- Read the user manual completely and carefully before use.
It is part of the product and contains important information for correct use.
- Keep this user manual.
- *It must be available for uncertainties and passing the product.*
- Do not open the housing.
- Voltage-free only with pulled plug.
- Only let a trained electrical engineer do installation, disassembling, maintenance and repairing work.
- Compare the specifications of product, power supply and peripherals. These must be identical.
- Do not repair defective products by yourself, but contact the dealer or producer.
- Do not modify or alter product nor accessories.
- Avoid stresses such as heat and cold, moisture and direct sunlight, vibration and mechanical pressure.
- Only use in dry ambience.
- Nicht hintereinanderstecken.
- Do not cover the product.
- Do not plug in a row.
- The overvoltage protection is active when the surge protection indicator is on.
- Do not operate in an explosive environment.
- Secure packaging, small parts and insulation against accidental use.
- Risk of injury by stumbling and falling

1.2 Warning levels

CAUTION

Warnings against hazards that may result in **injuries** in case of non-observance.

NOTICE

Warnings against hazards that may result in **material damage** in case of non-observance.

2 Description and Function

2.1 Description

Your product is a power strip with extension cable for home use. It comes with an overvoltage protection and a power switch with operation indicator and has a shock-resistant housing, child protection and a cable management system.

2.2 Scope of delivery

Power strip, user manual

2.3 Operating elements and parts

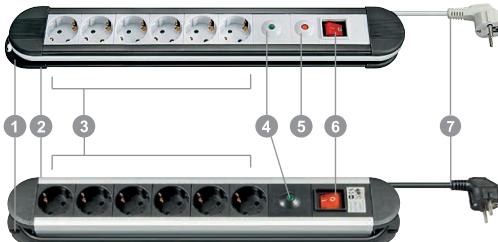

Fig.3: Operating elements and parts

- 1 impact-resistant casing with model-dependent mounting option
- 2 Cable Management System
- 3 Safety power outlets with child protection
- 4 Surge protection indicator „SURGE PROTECTION“
- 5 RESET switch for the overvoltage protection
- 6 ON / OFF switch
- 7 Power cord with model-dependent length

3 Intended Use

We do not permit using the device in other ways like described in chapter Description and Function. Use the product only in dry interior rooms. Not attending to these regulations and safety instructions might cause fatal accidents, injuries, and damages to persons and property.

4 Preparing

- Compare the specifications of product, power supply and peripherals. These must be identical.
- Check the scope of delivery for completeness and integrity.

5 Connecting

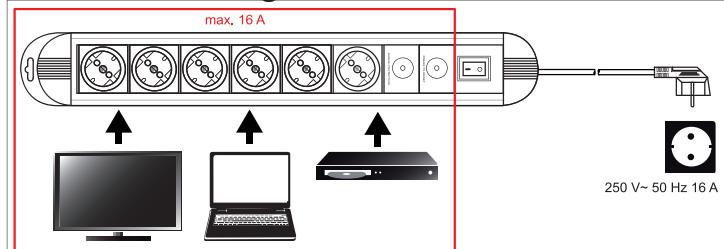

Fig.4: Connecting

1. Connect your household devices to the power strip.
2. Connect the power strip to a good accessible safety power socket.
3. Switch the power switch to "I".
The power switch lights when the power strip is ready for use.
4. Disconnect all cable connections after use or switch the power switch to "O".

6 Operating

There are no operating elements to operate during use.

7 Remedy in the event of a fault

If the overvoltage protection indicator does not light up despite the voltage applied to the input side, proceed as follows:

1. Remove the power strip from the socket.
2. Remove the cause of the problem.

7.1 Plastic models

3. Press the „PRESS TO RESET“ button when the overvoltage protection has tripped.

The overvoltage protection is available again when the overvoltage protection indicator is lit. However, if the overvoltage protection indicator does not light up, there is no voltage on the socket side or the integrated temperature protection has tripped. In this case, the power strip must be replaced.

7.2 Aluminum models

The overvoltage protection is only available for a single overvoltage situation as long as the overvoltage protection indicator is lit. If this is extinguished, surge protection is no longer available. The power strip will continue to function normally, but without overvoltage protection. There is no further action needed.

8 Specifications

Housing	Plastic models	Aluminum models
Input voltage	250 V~ 50 Hz	
Max. allowable load	16 A	
Overvoltage protection	Uc 250 V~; TYP 3 Uoc 3 kV (L-N, L/N-PE) Up 1,8 kV (L-N, L/N-PE)	
Power cord length	1,4 / 3,0 m	
Power cord type	H05VV-F 3G 1,5 mm ²	
Protection class	1	
Protection level	IP20	
Safety	Temperature and surge protection	Single surge protection

Tab.2: Specifications

9 Maintenance and Cleaning

The products are maintenance-free.

NOTICE

Material damage

- Clean only with a dry, soft cloth.
- Do not use cleaning agents and chemicals.
- Store cool and dry.
- Keep and use the original packaging for transport.

10 Liability notice

We reserve the right to printing errors and changes to product, packaging or product documentation.

- See our terms of warranty. These are available in their current form under the given contact details.

11 Disposal Notes

According to the European WEEE directive, electrical and electronic equipment must not be disposed with consumers waste. Its components must be recycled or disposed apart from each other. Otherwise contaminative and hazardous substances can pollute our environment.

As a consumer, you are committed by law to dispose electrical and electronic devices to the producer, the dealer, or public collecting points at the end of the devices lifetime for free. Particulars are regulated in national right. The symbol on the product, in the user's manual, or at the packaging alludes to these terms. With this kind of waste separation, application, and waste disposal of used devices you achieve an important share to environmental protection.

12 EU Declaration of Conformity

With the CE sign, Goobay®, a registered trademark of the Wentronic GmbH ensures, that the product is conformed to the basic European standards and directives.
